

Liège, October 5, 2018

**Press release: The art gallery of the Maison des Métiers d'Art will open a new exhibition called 'Repair(s)' on October 5, on view until November 10, as part of RECIPROCITY DESIGN LIEGE**

**During the International Triennale Design of Liège, the Office provincial des Métiers d'Art (Provincial Office of Art Professions) will open its new exhibition called 'Repair(s)' which will highlight the works of three artists: Cathy Alvarez, Véronique Martinelli and Véronique Renier. This exhibition is on view from October 5 to November 10 at the art gallery of the Maison des Métiers d'Art.**

At the beginning, there were the meetings of Cathy Alvarez, Véronique Martinelli and Véronique Renier: three worlds talking to each other, shared concerns, life pathways that understand each other, gestures that look alike. Their art takes different forms: photography, engraving, sculpture, embroidery, lace... Because any means are fine to achieve one's goals: repairing, repairing oneself and easing the pain.

**Cathy Alvarez's** work covers embroidery, ceramic and photography on the theme of repairing. **Véronique Martinelli**, for her part, mends, darns, reshapes as to illustrate her opinion on impressions, remembrance, personal paths, shared destinies, timelessly in resonance with one another. Last but not least, **Véronique Renier's** art work is a research on impressions that do not dwell on the past but do question and reflects on our multiple and ever changing identities, between remembrance and forgetting.

Your dearest piece of clothing is suffering? The artists will be available for you on October 6 and November 10, from 2 to 5pm, and will show you artistic ways of repairing it.
