

Tod's presents the new eyewear collection, which revolves around two distinctive themes.

Iconic, that includes standout frames characterized by exclusive leather details stemming from special manufacturing techniques. *Threading*, a unique stitching technique that is entirely handcrafted by expert Italian artisans and is dedicated to women's styles; and *braiding*, the skillful art of braiding colored strips of leather together to lend a distinctive and handcrafted feel to every single product. The *Timeless* theme redefines beauty, reinterpreting icons of the past with a contemporary twist through vintage-inspired frames defined by the distinctive Timeless "T" logo, Tod's instantly recognizable metal detail that recalls the brand's leather goods collections, for timeless elegance. Its signature elements include a selection of premium and modern materials inspired by Tod's luxury world, which is transposed into exquisitely designed and highly functional styles.

In the new eyewear collection, the iconic *Timeless* T is presented in a larger version, to enhance this perfect detail that is a distinctive signature element personalizing all the new Tod's accessories collections.

New entries of the collection include clip-on glasses, to add that extra touch of character and functionality to the frame or to change your look in a click.
