

SAVE THE DATE

THE KIKK FESTIVAL 2020
from Thursday 5 to Sunday 8 November
in Namur

The KIKK Festival, a major international event for digital and creative cultures, returns to Namur from Thursday 5 to Sunday 8 November 2020. With more determination than ever, despite a complicated health context, the KIKK Festival unveils a rich programme of plural activities totally free of charge for all audiences during four days. The main event of this new edition, the opening of the *Pop-Up Pavilion*. The former Belgian Pavilion at the Milan Universal Exhibition was relocated to the Esplanade de la Citadelle will host this new 2,700m² exhibition and experimentation space dedicated to digital issues. The new temporary exhibition, *Humans / Machines*, will be shown there before the building closes on 31 January 2021 for refurbishment.

This 2020 edition is structured around two main axes, an artistic tour of works in the city and the inauguration of the *Humans / Machines* exhibition in the *Pop-Up Pavilion*. The *KIKK in town* programme takes visitors to discover installations by international artists dispersed in a dozen places, monuments and heritage gardens in the historic heart of the city of Namur. The Pavilion, in its pop-up format, offers a vast, immersive and interactive temporary exhibition questioning robotics and artificial intelligence at the crossroads of innovation, research and art.

In addition to this general public section, a professional section is open to all cultural and creative industry professions or any professional curious to sharpen his or her digital profile. Determined but responsible, the organizers are committed to ensuring that all the activities proposed in this new edition respect the current health & safety measures.
